

We are moving

The **Complete Fertility Centre Southampton** is moving to a state-of-the-art, new premises.

Our team of leading fertility specialists has been involved in the design of our new clinic and facilities every step of the way, ensuring the spacious new setting will help optimise treatment and make the patient journey as comfortable and effective as possible.

All embryos, eggs, and sperm (including donor) currently stored at our Princess Anne Hospital site will remain there and be closely monitored until they are moved, by a specialist company, in September. If patients have any questions, please get in touch by email.

From the end of July 2023 all consultations and scans will take place at our new premises. From September, all treatments will be available.

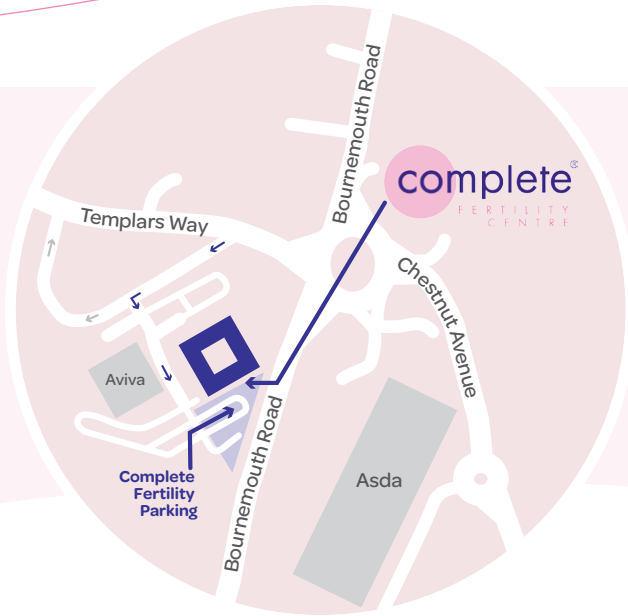

**3 Hampshire House, Templars Way,
Chandler's Ford, Eastleigh SO53 3RY**

**Clinic Director
Georgina Collins
explains:**

“*We look forward to welcoming you to our new clinic and believe the ease of parking, state-of-the-art laboratory and the comfortable environment will help you, our patients, feel confident and at ease as you start your fertility journey with our team.*”

How to find us:

The entrance to the new clinic is at the back of the building where you will also find plenty of car parking spaces.

Our Services:

Fertility testing

We offer comprehensive tests to help evaluate male and female fertility.

Fertility treatments

We offer a range of fertility treatments to help you conceive.

Donor program

Our donor program can assist people wanting to use or become a sperm or egg donor.

Fertility preservation

Protect or preserve your fertility for the future, including egg, sperm and embryo freezing.

Fertility counselling

We offer a fertility counselling service to provide extra support before, during or after fertility treatment.
